Modular Exhibitions

Modular tailored to your event

Exhibitions come in all shapes and sizes

Modular Displays that grow with you

Our modular exhibition stands are designed to be flexible and adaptable in size and shape and come with a range of accessories.

Each system is designed to be set up and dismantled without any expert knowledge or any tools. Supplied with a range of cases and storage options, they can be easily transported to and from your event.

Our customer service team will discuss your requirements and provide drawings to illustrate how one of our modular systems will fit into the area needed for your events.

We can offer a simple consultation and supply service, or a full logistics service including arranging on-site services, transportation, installation and dismantling and storage between events.

From self-build stand to more complex designs there really is a option to suit every business. We have options to start small and grow big over time.

Each of our systems offers something for every exhibitor, whether you need a simple display for a small area, or if you need interesting elements to go with the stand like impressive architectural features, screen and product display showcases, budget friendly options or a full service where we store, deliver, construct and dismantle. Leaving you the time to relax and concentrate on your show.

Twist

Pop up display system

Key Features

- Patented tensioning system for self levelling and flat graphic panels
- Seamless linking of graphic panels with Flexi-Link and Easi-Link kits
- Create bespoke, unique shapes
- Smooth and natural curves with the patented Flexi-Link Kit
- Cost effective solution
- Range of accessories including screen/tablet brackets, lights & shelves.
- Portable, transport in carry bags or case

High Impact Exhibition Stands

The Easi-Link kit is used to link Twist Display Stands to create a flat wall or backdrop or create the ultimate bespoke exhibition stands by utilising both Flexi-Link panels and Easi-Link kits.

We can help you to visualise a bespoke Twist configuration with our free In House design service. Simply give us the stand spaces you want to use your Twist stands in, and we will put together 3D drawings showing the best configuration.

Impact modular

Takes you from mini pop-up to large scale modular

Make the modular move

This is a popular option for our customers that want to take the first step into large adaptable modular systems with budget flexibility & portability.

Available with many high end modular features, monitor holders, end panel lighting, internal and external showcase shelving, variable heights, private storage areas and fully adaptable graphics that make the display versatile at future events for years to come.

iMPACT!

Pop-up frames

Build & Expand with Centro Modular

A trusted option, Centro has the ability to be self built and combined with adaptable components, this system will suit a variety of retail and exhibition environments.

With 15 years of development and continued supply it's the perfect choice for customers who wish to build on existing kit and expand or new exhibitors to enter the market with confidence knowing they can grow into modular options well into the future.

REXframe

Re-usable Textile Frame System

Key Features

- Modular frame system
- Quick and easy assembly
- Versatile and modular
- Back-lighting available
- Range of accessories

The REXframe® System

REXframe® components are produced from lightweight aluminium and graphic panels from printed fabric. The sturdy aluminium frame is assembled using a simple connector system and has the option for high powered LED lighting. REXframe® is designed for simple set up without tools or training, but also adaptability by adding or removing framework sections and changing fabric panels when branding changes.

Seamless fabric branding

REXframe® printed graphic panels are produced from premium fabric. The fabric printed panels have a rubber lip which is easily inserted into the frame, with the elasticity of the fabric ensuring a perfect fit. The big advantage of using fabric panels is that large spans can be covered without joints to interrupt the display, creating a seamless exhibition stand. REXframe® graphic panels are lightweight for transportation.

Floorex Portable Flooring

Professional stands start from the ground up, flooring that sets the tone

Key Features

- Our flooring comes in panels that interlock
- The components hug each other and cannot move in any plane or direction
- No clicking or friction in the joining action
- The system can be put down and taken up quickly by one person without tools
- Space under the floor to run cables
- Four of popular finishes (alternative finishes & direct print options available)
- Superior quality
- Five year hardware warranty
- Quick turnaround

Perfect professional start & finish

A fully modular and adaptable floor system, popular with exhibitors that have repeated exhibitions and can save time and money purchasing their own hard wearing, professional looking floor that last for many years.

The raised floor allows cables to be hidden seamlessly and ramped edging gives the whole look a permanent floor feel, complimenting any exhibition space.

ISOframe Wave

Stunning looks, superior build quality, infinite flexibility & user-friendly

Key Features

- Flexible, reduce or expand your exhibition stand to suit the floorspace
- Easy to build, no tools, DIY construction
- Hard-wearing for regular use
- Range of accessories, shelves, lighting, literature stands, counters and TV stands
- Storage areas can be added
- 3D Drawing Service for planning available
- Variable heights 2090mm - 2490mm

Premium flexible portable system

Stunning looks, superior build quality, infinite flexibility and extremely user-friendly - ISOframe Wave is the first portable exhibition display system that can be formed into any shape. You can even extend or reduce the display without re-positioning graphics. This quality product will grow with your company and exhibition ideas for years.

The unique, Flexi-Wave link gives the exhibition display system superior build quality and total flexibility. With its compact nature the ISOframe Wave is also easily transportable and is assembled without tools - ideal for the self-build exhibitor

ISO Ripple

Flex ripple to almost any shape

Key Features

- Simple, tool-less assembly
- Bend and flex to suit the venue
- 800mm wide banners link to form backdrops
- Build full exhibition solutions with add ons

Banner, Pop-up? Why not have both!

You can re-use and reconfigure the size and shape of the display for future events, and with all the accessories you'd expect its flexible enough for all your future display needs.

ISO Bar

Street level mobile marketing

Key Features

- Combine units to build different shapes
- Minimal framework light but still very strong
- Optional adjustable internal shelving
- Optional back-lighting and down-lighting

Complete your ISO stand look

Create a fully functional reception area complete with unique shapes, internal shelving & lights. Fully modular counter system, sturdy, easy to build and compact enough to transport.

ISO Counter

Bespoke pro counters

Key Features

- Fast and easy tool-free assembly
- Use as counters or product display podiums
- Optional adjustable internal shelving
- Upgradeable to a maximum load of 75Kg

Variety & quality are standard

Five different shapes, all available in different heights to compliment the range. Superior build quality & portable nature makes this counter a winner, giving you years of reliable service.
